(DC type) Supply voltage: 24VDC NOTE: TOOL-Port A seperation between Hooks up by using the programming the power supply and the FP0 is needed to software NAIS Control FPWIN Pro or FPWIN GR and a single cable. allow for heat dissipation.

COM-Port: 2nd RS232C Interface (optional for all CPU units for serial communication)

Super Compact Size

A control unit a mere 25mm in width. Even expanded to I/O 128 points, the width is still only 105mm. The attachment area is the smallest in its class.

The control unit's dimensions are: W25* x H90 x D60mm. Also, the I/O unit can be expanded to a maximum of 128-points. Even so, the size is still only W105 x H90 x D60mm, a super compact design that breaks all previous common sense rules on small-scale PLCs. With the smallest-ever attachment area, the FP0 is perfect for installation in machines, facilities, and control boards where miniaturization is progressing even further.

*30mm width limited to I/O 32-points control unit.

Choose among 3 types of attachment

Slim attachment plate model

Flat attachment plate model (cannot be used with expansions)

Either 10 Points or the Maximum of 128 Points

Networking:

- ETHERNET
- PROFIBUS
- S-LINK
- MEWNET-F
- Analogue modules featuring different numbers of input and output channels
- Programming software:
- Control FPWIN Pro according to IEC 61131-3
 Control FPWIN GR easy,
- conventional programming
- The photo illustrates adding three I/O 32-point expansion units to an I/O 32-point control unit, yielding 128 points.

Supply voltage 24VDC.

Easy Expansion

The expansion unit can be attached easily without any cables.

The expansion unit can easily be attached directly to the control unit. Special expansion cables, backplanes, and so forth, are unnecessary as the expansion unit employs a stacking system that uses expansion connectors and locking levers on the surface of the unit itself.

unit unit unit unit

(Maximum possible expansion is three units)

Because of its super compact size and high capabilities, the units are useful in a wide variety of applications.

FP0 CPU Units

A rich line-up of both single and combined units

FP0 – Impressive Capabilities High specifications for both speed and capacity

0.9µs per basic instruction. Pulse catch and interrupt input functions meet the need for high-speed response.

High-speed execution

Execution speed of 0.9µs per basic instruction. 500 steps program yields a scanning time of 1ms, which means the FP0 boosts the fastest processing time among the products of this class.

Internal processing in the FP0

Pulse catch function

Can read pulses as short as 50µs, which greatly facilitates sensor input. • Pulse catch function

Interrupt input function

Accurate processing, unaffected by scan time • Interrupt input function

Large capacity

A top-class large 5k and 10k steps program capacity housed within a compact body. Furthermore, data capacity for internal devices like the data register is also ample. The unit's high performance is even suited to complicated controls and controls with multiple amounts of data.

	Control unit type

Equipped with 2-axis independent positioning and high-speed counter for support of PWM output.

TTTTT

Pulse output function

(For transistor output type only) The unit comes equipped with 2 channels for the output of up to 10kHz pulses (5kHz during 2-channel output). Since these two channels can be separately controlled, the PLC is also suitable for independent 2-axis positioning. Setting automatic trapezoid control, automatic return to home position and JOG operation are made very easy by using instructions specially designed for such operations.

Serial printe

High-speed counter function

The high-speed counter is prepared for 4 channels in single phase, and 2 channels in 2-phase. In single phase, the 4-channel total is 10kHz, and in 2-phase the 2-channel total is 2kHz total speed, making the unit suitable for conveyer control, inverter control, and so forth using an encoder. Encoder

PWM output function

Its PWM (Pulse Width Modulation) output function makes it possible to provide temperature control with a single compact FP0 unit. (For transistor output type only)

- The FP0's second RS232C port (types C10CRS, C14CRS, C16C, C32C, and T32C) allows direct connection to computers and operation display panels. Also, bi-directional data communication with barcode readers and other RS232C devices is made easy.
- · Both the relay type and transistor output type control units are optionally equipped with a 2nd RS232C port.

Imagechecker

When reduced.

Analogue control function

Analogue control is made simple with four types of analogue modules featuring different numbers of input and output channels. Also, despite the small size, the I/O resolution is a high 1/4000 (12 bits). Support various I/O ranges by setting the DIP switches on the analogue I/O unit for simple operation.

Bar code reader

FP0 Communication Serial interfaces and modem compatible

Communication – Simple and efficient via two serial interfaces: TOOL-Port and COM-Port (RS232C interface).

Programming interface TOOL-Port (also for communication)

In Computer Link mode, this port offers access to the entire FP0 memory area. For example during data exchange between a host PC running SCADA software and an FP0 PLC, the Windows[®] based MEWNET-DDE Server assumes total control of the communications protocol (MEWTOCOL.COM). Therefore the user can disregard the allocation of data ranges and transfer parameters, because there is no additional programming required. The programmer is thus free to concentrate exclusively on the project application requirements.

Communication Interface COM-Port

(flexible with two modes of operation, Computer Link and General Purpose)

In addition to the Computer Link communication possibilities described above, the optional integrated RS232C COM-Port in the FP0 CPU module (types FP0-C10CRS, FP0-C14CRS, FP0-C16C, FP0-C32C and FP0-T32C) offers flexible programming i.e. General Purpose. In this configuration it is possible to realise communication connections with different RS232C peripheral devices, e.g. Bar Code Readers, slave devices, printers, measurement sensors or telecommunication transmitters, etc.

Communication Interface COM-Port

Freely programmable RS232C interface for CPU modules type FP0-C10CRS, FP0-C14CRS, FP0-C16C, FP0-C32C and FP0-T32C

Programming Interface TOOL-Port

For programming, and additionally Master/Slave communication, using MEWTOCOL COM (Matsushita protocol)

Modem compatible

Even modem communication function is built into this compact body. Using a single telephone line, programming maintenance can be carried out in remote facilities. With C-NET, multiple FPO units can be connected.

FP0 Communication

Easier maintenance than ever before

Maintenance saving

Program memory uses EEPROM. In addition, programs can be changed even in RUN mode!

Overwrite function in RUN mode

It is possible to overwrite a program while the FP0 is running, such as during program debugging and startup adjustments.

Backup battery unnecessary

The program memory uses EEPROM. The program and device contents can be stored without a backup battery, and even programming for a machine builder is safe.

Password function

A password function can be set in order to change a program. Limited to people authorized to make program changes, protection can be guaranteed better than ever.

Input/output verification LED

Every unit is equipped with LED I/O indicators, housed within a compact body. Input/output status can be verified at a glance.

Simple installation

Comes with either terminal block or connector. Either type is easy to connect to wiring by simply removing the terminal section.

resorting to crimping (made

Terminal block

Compatible models FPO-C10RS, C10CRS, C14CRS, E8RS, E16RS

MIL connector

Unit connectors can be used with 16-points and 32-points units. Due to the loose-wiring, pressure contact type design, wiring is easy without the need for insulation. (MIL-C-83503)

Compatible models FP0-C16T/C16P/C16CT/C16CP, C32T/C32P/C32CT/C32CP, E16T/E16P, E32T/E32P, FP0-T32CP/T32CT

FP0 PROFIBUS DP Slave or Remote I/O Unit

10000

For cost effective control of distributed field device

The FP0 DPS2 can operate either as a DP slave module or as a remote I/O system to which different decentralised inputs and outputs can be connected. A DIP switch can be used to switch between the two modes:

Mode 1:

DP-Slave module. Connect the FP0 or FP Σ (Sigma) CPU + expansion modules to the PROFIBUS network.

Mode 2:

Remote I/O. Connect up to three expansion modules without CPU to the PROFIBUS network.

In Remote I/O mode the unit can be connected to any PLC which offers a PROFIBUS communication interface, making it totally independent of NAiS PLCs.

FP0-DPS Specifications

Item		Description
Type designation		FP0 DP Slave unit, Ord. No. FP0DPS2
PROFIBUS standards comp	olied with	EN 50170, DIN 19245 Part 1 and Part 3
Devid rates		9.6 / 19.2 / 93.75 / 187.5 / 500 / 1,500 / 3,000 / 6,000 / 12,000 Kbaud
Baud rates		automatic baud rate detection
Range of adresses that can be set		0125
PROFIBUS connection		9-pin D-sub connector
Configuration	DP-Slave	2 words input / 2 words output, up to 6 words input / 6 words output if no other expansion is connected
Configuration R	Remote I/O	Remote I/O, max. 3 FP0 expansion units
FP0 communication		Via FP0 system bus
Power supply		24VDC (21.6VDC 26.4VDC)
Max. power consumption		100mA

Special developed software tools ensure easy configuration and start-up of PROFIBUS products.

AFP86910

FP0 S-LINK Unit

Connects directly to the S-LINK for reduced wiring

S-Link is a system which simplifies connection of rapidly increasing control devices accompanying progressing automation and is useful in reducing your costs and construction time.

Features

- Small size of only W30 x H90 x D60 mm. Makes use of the T-shaped connectability of the S-LINK for reduced wiring and reduced size of the control panel.
- 2. Controls 64 input points and 64 output points. Able to control up to 128 points for S-LINK-related devices.
- **3. Allows simultaneous use of expansion units.** Similar to other FP0 units, up to three expansion units can be used for efficient I/O wiring.

4. A wide range of I/O modules allow manifold customer-oriented network layouts.

FP0-SL1

Power supply

Applicable Network

Item	Description
Remote I/O	Control unit functions as S-LINK master station. Available as a slave station of MEWNET-F by adding I/O link unit
Inter-PLC link	Not available
Computer link	Linkable with tool port or RS232C port
Modem connection	Available, Type with RS232C port can also send data

Other Built-in Functions

Item	Description
Program block-edit during RUN	Available
Constant scan	Available
Adjustable input time filtering	Not available
Clock/Calendar function	None

Applicable Functions

T-branch mu

Item	Description
Pulse catch/Interrupt input	None
Analogue I/O	Available by adding analogue I/O unit
Volume input	None
High-speed Counter	None
Pulse output	None
RS232C port	1 ch is equipped. 3P terminal blocks (made by Phoenix Contact Co.)

Direct connection for reduced wiring

The layout of devices becomes flexible

and the design is easier due to the 'T'-branch multi-drop wiring.

Maximum length: 200m

Max. 128 points

Wire-saving

The use of wires is greatly reduced and the number of connecting terminal blocks is minimized, resulting in large reduction in cost, as well as, the waste generated during wiring.

Space effective

S-Link devices are compact. The control box can be mounted in a tight space.

Quick construction

Sensors cab be easily connected with plug-in connection.

FP0 MEWNET-F Unit Networking units

MEWNET-F

The FP0 can be used as a slave station for MEWNET-F (remote I/O system) by adding I/O link unit.

MEWNET-F is a reduced-wiring remote I/O system that connects PLCs located separately and I/O slave stations with 2-core cabling. By adding an I/O link unit to the FP0, you can link master station PLC and FP0 inputs and outputs via the network.

MEWNET-F Slave FP0-IOL

FP0-IOL Link Unit Specifications

Item	Description
Communication method	Two-wire, half duplex transmission
Synchronous system	Start stop synchronous system
Transmission line	2-wire cable (Twisted-pair cable or equivalent to VCTF 0.75 mm ² x 2C)
Transmission distance (Total distance)	Max. 700m per port (using twisted pair cable) Max. 400m per port (using VCTF cable)
Transmission speed (Baud rate)	0,5Mbit/s
Number of control I/O points per an I/O link unit	64 points (Input: 32 points and Output: 32 points)
Remote I/O map allocation	32X/32Y
Interface	Conforms to RS485
Transmission error check	CRC (Cyclic Redundancy Check) method

C-NET

By using C-NET, you can use multiple FP0s as data collection terminals.

By using the C-NET network and exclusive adapters, you can connect multiple FP0s by multi-drop connection with 2-wire cables. You can use computers for separate control or have network terminals for a centralized management system.

FP0 Thermocouple Input Expansion Units Enable high precision temperature control at low cost

VVIII

The FP0-TC4 and FP0-TC8 thermocouple units are suitable for user friendly temperature acquisition using standard thermocouples with high precision.

- Up to three units can be added to each control unit, enabling temperature control of up to 24 channels.
- The temperature data obtained using the thermocouple is converted to the digital value to be read into the FP0 control unit.
- Standard types of thermocouples can be used: K, J, T and R
- 3 temperature measurement ranges are available: -100°C to +500°C (Thermocouple types: K and J)
 - -100°C to +400°C (Thermocouple type : T)
 - 0°C to +1500°C (Thermocouple type : R)
- The temperature data measured using the sensor is converted to degrees Celsius or degrees Fahrenheit inside the Thermocouple Unit.
- The converted data (°C or °F) is averaged, so that even unstable input signals can be properly read.
- Broken thermocouples can be detected.

Temperature control

FP0 TC8 8 channels

FP0 TC4 4 channels

FP0-TC4 and FP0-TC8 specifications

Insulation method	- between thermocouple input terminals and control unit internal circuits Photo-coupler insulation/DC-DC insulation - between thermocouple input terminal channels PhotoMOS relay insulation					

Analogue Signal Processing FP0 Analogue Units

Features

The analogue units can be used with the FP0 and $FP\Sigma$ (Sigma) so wide range applications are possible from small-scale machines to factory production systems.

Each CPU supports up to 3 FP0 analogue units. Combination with digital and analogue expansion units is freely allowed.

Highest performance is offered with 12-bit resolution. With a current and voltage output conversion time of up to 500µs, the units are capable of high-speed processing.

The multimode FP0 analogue unit can be configured via the DIP switches on the front side into the required analogue ranges. Communication with the FP0 CPU unit is achieved via the expansion bus. The expansion bus is automatically connected after the FP0 analogue unit is connected to the FP0 CPU unit.

Note: Function Blocks for FPWIN Pro Programming System can be downloaded free of charge from our WEB-page.

FP0 RTD Input Expansion Unit

User friendly acquisition of temperatures with high precision

Features

The module can be easily installed in an existing system: Special connection cables, backplanes, and so forth are unnecessary as the expansion unit employs a stacking system that uses expansion connectors and lock levers on the surface of the unit itself.

- Multiple RTD types are allowed in one module, creating a cost-effective solution.
- About the Application areas:
 - Measurement and control equipments
 - Process and Machine controls
 - Greenhouse and Agro industries

FP0-RTD6 6 channels

Take advantage of the various FPWIN Pro libraries with many functions and function blocks. These ready-made programs can be saved and reused time and again and will help you to shorten the time needed to develop applications drastically, and consequently to save valuable human resource costs.

Controller Library: NCL-MR-LIB

The programmable logic arrays of the controller library simplify the programming of closed loop controlled electrical installations. The library includes linear and non linear controller types such as the P/I/PI/PID controller and two points-/three-points controller with and without hysteresis. Programmable logic arrays for dead band, interpolation, lamp limiting, dead time and averaging are also included.

FP0-RTD6 specifications

Item		Specification		
Input points	Up to 6 channels per unit - 3 inputs per one Phoenix screw terminal - for every sensor 3 screws			
Input type	Pt 100 -200°C to	500°C (3 wire)		
	Pt 1000 -100°C to 2	200°C (2 wire)		
	Ni 1000 -30°C to 150°C (2 wire)			
	Resistor measurement			
Sampling cycle	0.1sec / 1sec for 6 channels - depending on the switch setting (slower cycle timer = higher accuracy)			
Temperature resolution	01K			
Accuracy	cycle time 0.1 sec:	Pt 100: 0.5%/3.5K, Pt 1000: 05%/2.5K, Ni 1000: 2K, Resistor:2Ω		
at ambient temperature: 0-55°C	cycle time 1 sec:	Pt 100: 0.35%/2.5K, Pt 1000: 035%/1.7K, Ni 1000: 1K, Resistor:1Ω		
Accuracy	cycle time 1 sec:	Pt 100: 0.3K from -10 to +30°C, 0.2%/1.4K from -200 to +500°C		
at ambient temperature: 25°C	cycle time i sec.	Pt 1000: 0.3K from -10 to +30°C, 0.2%/1.0K from -200 to +300°C		
Size	W 25 x H 90 x B 60 mm

Interfaces

Item	Description
Programming TOOL-Port	RS232, mini DIN socket (5 pin), 9600 or 19200 BAUD, (8 data bits, odd parity, 1 stop bit), Computer link for programming and communication with MEWTOCOL.COM, user configurable modem connection
Communication COM-Port	RS232 (SD, RD, GND) 3 way screw terminal, 300 to 19200 BAUD, (7 or 8 data bits, none/even/odd parity, 1 or 2 stop bits, start code: none/STX, end code: CR/CR+LF/ETX/none, CCU mode for programming and communication with MEWTOCOL.COM, user configurable modem connection, GENERAL PURPOSE MODE controlled by program for general purpose RS232 communication.

111

Input specifications

Item		Description	
Insulation method		Optical coupler	
Rated input voltage		24VDC	
Operating voltage range		21.6 to 26.4VDC	
Rated input current		4.3mA or less (at 24VDC)	
Input points per common		6 points/common (C10RS) 8 points/common (C14RS,C16T/C16P,E16T/E16P) 16 points/common (C32T/C32P,E32T/E32P)	
ON voltage/ON current		19.2V or less/ 3mA or less	
OFF voltage/OFF current		2.4V or more/ 1mA or more	
Input impedance		Approx. 5.6kΩ	
		50µs or less (at X0,X1)(*)	
	OFF→ ON	100µs or less (at X2 to X5)	
Response time		2ms or less (at X6 to XF)	
	ON→ OFF	same as above	
Operating indicator		LED display	

Note: (*): Since the response time of X0 to X5 is very fast (for high-speed counter input), the FP0 happens to catch chattering noise as an input signal. To prevent this, it is recommended that timer instruction should be included in the program.

Output specifications

1) Relay output type

Item		Description		
Output type		Normally open(1 Form A)		
Rated control capa	acity	2A 250VAC, 2A 30VDC(4.5A/common)		
Deen en es time	OFF → ON	10ms or less		
Response time	ON→ OFF	8ms or less		
Life	Mechanical	20million operations or more		
Life	Electrical	100k operations or more		
Surge absorber		None		
Operation indicator		LED display		

The FP0 series conforms to the following standards under the EMC Directive and the Low Voltage Directive.

EMC Directive (89/336/EEC) EN 50081-2: 1993 EN 50082-2: 1995

Low Voltage Directive (73/23/EEC) VDE 0160: 1988 (EN 50178: 1995) (Overvoltage Category II, non-mains-circuit, pollution degree 2) EN 61131-2: 1995

2) Transistor output type Item Description Insulation method Optical coupler Output type Open collector Rated load voltage 24VDC 5 to 24VDC Load voltage allowable range 4.75 to 26.4VDC 0.1A/points(at DC26.4V) (1A/common)(*1) Max. load current Max. inrush current 0.3A Leakage current at OFF time 100µA or less Max. voltage down at ON time 1.5V or less External power Voltage 21.6 to 26.4VDC supply Current 240mA or less (For internal circuit) OFF → ON 1ms or less Response time ON→ OFF 1ms or less(*2) Surge absorber Zener diode Operating indicator LED display

Notes:

(*1): &points/common(C16T/C16P,E16T/E16P), 16points/common(C32T/C32P, T32CP, E32T/E32P) (*2): 50µs or less at Y0, Y1 only

Control FPWIN Pro PLC programming software conforming to IEC 61131-3

Control FPWIN Pro is the Matsushita programming software according to the international standard IEC 61131-3. **Control FPWIN Pro** works with the FP0 as well as any FP series programmable controller. Also, since the tool port is an RS232C, connection to a PC is easy – it only requires a single cable. No converter or adapter is required.

Control FPWIN Pro - Programming

The most important highlights at a glance:

- Reuse of ready made functions and function blocks saves time for programming and debugging
- 5 programming languages (Instruction List, Ladder Diagram, Function Block Diagram, Sequential Function Chart, Structured Text)
- Convenient comment application in 6 languages (English, German, French, Italian, Spanish, Japanese)
- 4 standard libraries (IEC Standard library, Matsushita library (M Lib), Pulsed library (P Lib), NC Tool library (NC Tool Lib))
- E Fewer errors through defined data types and encapsulation
- Well-structured through programme organisation units, taskand project management
- Online monitoring and diagnostic
- Ethernet and Modem communication for remote-programming, -service, and -diagnostic
- Password protection with different levels
- Many additional application libraries available
- IEC 61131-3 protects your investments for the future

Control FPWIN GR

PLC programming software for easy operation

Features

FP Series programming software for Windows.

- 1. To facilitate operation on site, a mouse is not required for input, search, write, monitor and timer edit operations. Everything can be accomplished with a keyboard alone.
- 2. Standard Windows operations, such as copy and paste, are included.
- 3. Supports all FP series machines. Software created with NPST-GR Ver. 3 or 4 can also be used.
- 4. Inherits convenient functions developed for NPST-GR.

Usage environment

OS	Windows 95/98/NT (Ver. 4.0 or later)/XP
Required hard disc capacity	At least 30MB
Recommended CPU	Pentium 100MHz or higher
Recommended installed memory	32MB or more
Recommended screen resolution	800 x 600 or higher
Recommended display colors	High Color (16-bit or higher)

Applicable PLC types

*All products on the market are supported. All FP series types are supported: FP∑ Sigma, FP0, FP-e, FP1, FP2, FP2SH, FP3, FP10SH, FP-M

Note: FPWIN GR Vers. 2.2 or later is needed to program the FP-e

Menu

Tool bar Access often-used functions using icons.

Function bar

Provides information regarding command input and confirmation, on-line/off-line selection and PLC mode selection.

Function instruction list

Classified by type, function commands can be selected from the displayed list. (Simple help included.)

I/O comment edit function

Successive I/O comments can be input for each device type. Data from Excel and other applications can be copied and pasted via the clipboard.

Status display

Displays information concerning PLC usage environment and settings, and detailed information when an error occurs.

Control CommX, PCWAY, OPC Server

Visualisation software for ready made or customised solutions

TTAT

Control CommX

The connection in ActiveX technology.

- Connects your Visual Basic application to Matsushita PLCs.
- Gives you the possibility to easily develop highly customised control solutions.
- Create your own application very quickly by simply adding the functionality of ActiveX control to your code written with Visual Basic.
- No knowledge of MEWTOCOL (Matsushita's PLC communication protocol) needed.

Setup Process

	Tomore and the participant of th			etion
	Finness			Idmo
Initial Setup in Visual Basic	Configuration of Communication	Register of Various Communication Types	Programming	3

PCWAY

Add-on software for Excel to monitor and change PLC data.

- The Excel add-in software PCWAY is available for data collection of the networked PLCs. The contents of the PLC bits and data registers can be simply shown and managed on Excel worksheets.
- Settings in PCWAY can be used to switch display contents and character colour corresponding to contact on/off status and register values, and perform calculations based on register values. Excel macros are not necessary.

MEWTOCOL OPC Server

The connection between PLC and SCADA software.

- Provides a standard interface between our FP Series PLCs and various SCADA/HMI software* used to build a monitoring system compliant with commercially available OPC clients. It is also possible to use OPC automation interface to link our FP series PLCs with Visual Basic.
- OPC (OLE for Process Control) is an interface standard for linking software with various companies' control devices. This standard allows connections between OPC-compliant products.

* We have confirmed linking with iFIX Ver.2.6 (Intellution), InTouch Ver.7.0 (Wonderware), and RSView32 Ver.6.3 (Rockwell Software).

*2 The current consumption from the power supply connector block of the expansion unit and intelligent unit.

FP0 Series Power Supplies

Features

Incredibly small size:

- FP0 power supply: 90 x 60 x 30.4mm
- FP power supply: 115 x 75 x 42mm

Maximum output current:

- FP0 power supply: 0.7A (24VDC)
- FP power supply: 2.1A (24VDC)
 - | ← 30.4mm_ 90mm

FP0 Power supply FP0-PSA2

FP Power supply FP-PS24-050 E

NOTE:

NOTE:
1) Mounting distance between the FP0 power supply and the FP0 CPU is needed to permit heat radiation for the FP0-CPU
2) For side mounting, 2 additional blue clips are needed: order part-no. 677-021-17101 (1pce) for FP0-PSA2
3) Mounting distance between the power supply FP-PS24-050E and other devices is needed for cooling / heat radiation.

- Multiple voltage input: 85 to 265VAC
- Optimal protection: overvoltage, overcurrent, overheating, etc.
- Global approvals (UL/cUL, EN, CE-marking)
- DIN-rail mounting (FP0 power supply also side mounting)

Performance specifications

Rated output voltage	24\	/DC
Output voltage range	23.5V to 24.5VDC	
Nominal output current	0.7A	2.1A
Output current range	0 to 0.7A	0 to 2.1A
Output ripple	< 60mV _{pp}	< 240mV _{pp}
Short circuit protected	electronic, automatic restart mode	continuous
Over voltage protected	Yes	
Over load protected	Yes (switch off at approx. 0.8A and more)	Yes (switch off at approx. 3.5A and more)
Holding time	min. 20ms at 230VAC	min. 110ms at 230VAC
Power OK signal	_	Yes

1775

General specifications

Ambient temperature	0°C to +55°C	
Storage temperature	-20 °C to	o +70 °C
Ambient humidity	5 to 95% non-condensing	
Storage humidity	5 to 95% non-condensing	
Vibration resistance	10 to 55Hz, 1 cycle/min.: double amplitude of 0.75mm, 10 min. on 3 axes	
Shock resistance	10g min., 4 times on 3 axes	
Life time min.	7 years at nom. load, 25°C ambient temperature, 20000 h at 55°C with full load/continuous operation	
Mounting	DIN rail or FP0 flat attachement plate	DIN rail
Size	90 x 60 x 30.4mm	115 x 75 x 42mm
Input connection AC side	MC connector, 2 pin	2 pin
Output connection DC side	MC connector, 6 pin, 3 pin for "+" and 3 pin for "-"	5 pin, 2 pin for "+" and 2 pin for "-"; 1 pin Power OK
Status display	LED (green) at the front side for the secondary voltage indication	

Standards

FP0 Product Overview

Order numbers

Product Name	Part Number
PO-C10RS, 6 Inputs / 4 Outputs (p+n / Relay)	FP0-C10RSA
P0-C10CRS, 6 Inputs / 4 Outputs (p+n / Relay), RS232 COM-Port Interface	FP0-C10CRSA
P0-C14RS, 8 Inputs / 6 Outputs (p+n / Relay)	FP0-C14RSA
P0-C14CRS, 8 Inputs / 6 Outputs (p+n / Relay), RS232 COM-Port Interface	FP0-C14CRSA
P0-C16P, 8 Inputs / 8 Outputs (p+n / Transistor PNP)	FP0-C16PA
P0-C16CP, 8 Inputs / 8 Outputs (p+n / Transistor PNP), RS232 COM-Port Interface	FP0-C16CPA
P0-C32P, 16 Inputs / 16 Outputs (p+n / Transistor PNP)	FP0-C32PA
P0-C32CP, 16 Inputs / 16 Outputs (p+n / Transistor PNP), RS232 COM-Port Interface	FP0-C32CPA
P0-C16T, 8 Inputs / 8 Outputs (p+n / Transistor NPN)	FP0-C16TA
P0-C16CT, 8 Inputs / 8 Outputs (p+n / Transistor NPN), RS232 COM-Port Interface P0-C32T, 16 Inputs / 16 Outputs (p+n / Transistor NPN)	FP0-C16CTA
PO-C32CT, 16 Inputs / 16 Outputs (p+n / Transistor NPN) PO-C32CT, 16 Inputs / 16 Outputs (p+n / Transistor NPN), RS232 COM-Port Interface	FP0-C32TA FP0-C32CTA
PO-C32CP, 16 Inputs / 16 Outputs (p+n / transistor PNP), RS232 COM-Port Interface, 10 000 steps Program memory	FP0-T32CPA
P0-T32CT, 16 Inputs / 16 Outputs (p+n / Transistor NPN), RS232 COM-Port Interface, 10 000 steps Program memory	FP0-T32CTA
PO-SL1, S-LINK CPU, Master	FP0-SL1
2. Expansion Units	
Product Name	Part Number
P0-E8RS, 4 Inputs / 4 Outputs (p+n / Relay)	FP0-E8RSA
P0-E8X, 8 Inputs (p+n)	FP0-E8XA
P0-E8YP, 8 Outputs (Transistor PNP)	FP0-E8YPA
P0-E8YT, 8 Outputs (Transistor NPN)	FP0-E8YTA
P0-E16RS, 8 Inputs / 8 Outputs (p+n / Relay)	FP0-E16RSA
P0-E16P, 8 Inputs / 8 Outputs (p+n / Transistor PNP)	FP0-E16PA
P0-E16T, 8 Inputs / 8 Outputs (p+n / Transistor NPN)	FP0-E16TA
P0-E16X, 16 Inputs (p+n)	FP0-E16XA
P0-E16YP, 16 Outputs (Transistor PNP)	FP0-E16YPA
P0-E16YT, 16 Outputs (Transistor NPN) P0-E32P, 16 Inputs / 16 Outputs (p+n / Transistor PNP)	FP0-E16YTA FP0-E32PA
PO-E32P, 16 Inputs / 16 Outputs (p+n / Transistor PNP) PO-E32T, 16 Inputs / 16 Outputs (p+n / Transistor NPN)	FP0-E32PA FP0-E32TA
P0-A21, 2 analogue inputs / 1 analogue output	FP0-A21A
PO-A80, 8 analogue inputs	FP0-A80A
P0-TC4, 4 thermocouple inputs	FP0-TC4
P0-TC8, 8 thermocouple inputs	FP0-TC8
P0-RTD6, 6 RTD Inputs, Pt 100, Pt 1000, Ni 1000	FP0-RTD6
3. AC Power Supply	
Product Name	Part Number
P0-AC Power Supply 24VDC / 0.7A	ED0 0040
	FP0-PSA2
4. Network	FP0-PSA2
Product Name	Part Number
Product Name P0-DPS2, PROFIBUS DP Slave or Remote I/O unit	Part Number FP0-DPS2
Product Name PO-DPS2, PROFIBUS DP Slave or Remote I/O unit PO-IOL, MEWNET-F Slave unit, I/O link	Part Number FP0-DPS2 FP0-IOL
Product Name P0-DPS2, PROFIBUS DP Slave or Remote I/O unit	Part Number FP0-DPS2
Product Name PO-DPS2, PROFIBUS DP Slave or Remote I/O unit PO-IOL, MEWNET-F Slave unit, I/O link PO-SL1, S-LINK CPU, Master	Part Number FP0-DPS2 FP0-IOL FP0-SL1
Product Name 'P0-DPS2, PROFIBUS DP Slave or Remote I/O unit 'P0-IOL, MEWNET-F Slave unit, I/O link 'P0-SL1, S-LINK CPU, Master C-NET S2 Adapter (Multi drop network slave adapter) C-NET Adapter (RS232/422 PORS485 Interface adapter), 230VAC	Part Number FP0-DPS2 FP0-IOL FP0-SL1 AFP15402
Product Name 'P0-DPS2, PROFIBUS DP Slave or Remote I/O unit 'P0-IOL, MEWNET-F Slave unit, I/O link 'P0-SL1, S-LINK CPU, Master C-NET S2 Adapter (Multi drop network slave adapter) 2-NET Adapter (RS232/422 PORS485 Interface adapter), 230VAC 5. Programming Tools	Part Number FP0-DPS2 FP0-IOL FP0-SL1 AFP15402 AFP8536
Product Name Pro-DPS2, PROFIBUS DP Slave or Remote I/O unit PO-IOL, MEWNET-F Slave unit, I/O link PO-SL1, S-LINK CPU, Master P-NET S2 Adapter (Multi drop network slave adapter) PNET Adapter (RS232/422 PORS485 Interface adapter), 230VAC D- Programming Tools Product Name	Part Number FP0-DPS2 FP0-IOL FP0-SL1 AFP15402 AFP8536 Part Number
Product Name PO-DPS2, PROFIBUS DP Slave or Remote I/O unit PO-IOL, MEWNET-F Slave unit, I/O link PO-SL1, S-LINK CPU, Master 2-NET S2 Adapter (Multi drop network slave adapter) 2-NET Adapter (RS232/422 PORS485 Interface adapter), 230VAC 5.
